

FOR IMMEDIATE RELEASE

TIGER AIRCRAFT NOW EQUIPPED WITH AMSAFE INFLATABLE RESTRAINT SYSTEMS AS PART OF THE STANDARD PACKAGE

*MARTINSBURG, WV, July 27, 2005* — Tiger Aircraft LLC recently named AmSafe Aviation of Phoenix, AZ as the exclusive provider of inflatable restraints in all Tiger aircraft.

The Tiger AG-5B will soon come with AmSafe Aviation Inflatable Restraints (AAIR<sup>®</sup>) as standard equipment in the pilot and co-pilot seats and as an option in rear seats. The Tiger AG-5B is known for its incredible speed for its size, fuel efficiency, and excellent safety record. It only makes sense that our top quality aircraft are equipped with the best restraint technology. We want our pilots to have fun and be as safe as possible, said Mat Goodman of Tiger Aircraft LLC.

Certification and introduction of the AAIR<sup>®</sup> on Tiger Aircraft are anticipated toward the end of the year. In addition to AAIR<sup>®</sup>, other standard features on Tiger aircraft include solid bonded honeycomb construction, rivetless aluminum skin, imported leather seats and renowned Garmin avionics.

AmSafe is pleased to partner with Tiger Aircraft in protecting those who fly with the most significant safety enhancement available to the general aviation flying community, said AmSafe AAIR<sup>®</sup> General Manager, Joe Smith.

AmSafe Aviation, a division of AmSafe, Inc., is the world leader in aviation restraint systems and airbag technology. AmSafe introduced the FAA-certified AmSafe Aviation Inflatable Restraint (AAIR<sup>®</sup>) in 2001. While AmSafe's traditional restraints remain standard in aircraft of virtually every major airline worldwide and countless private aircraft, they also provide safety for aircraft crews in most airliner types. Tiger Aircraft LLC was formed to revive, enhance, and build one of the most celebrated airplane designs in general aviation history the Tiger. Tiger Aircraft is dedicated to upholding the Tiger tradition: providing the most exhilarating, agile, and dependable fixed-gear planes available in general aviation. Today's Tigers are built in a new manufacturing facility in Martinsburg, WV, constructed especially to build the planes.
