LetsFly.org and Tiger Aircraft Join Forces to Create Affordable Flying

LetsFly.org, known for its economical flight time, cooperative ownership, and turn-key aviation business opportunity with 2-place aircraft has finalized a marketing agreement with Tiger Aircraft LLC. This new arrangement makes it possible for the Letsfly member to own and fly a brand new 4 passenger AG-5B Tiger for an initial investment of \$2900, with flight time of less than \$49.00/hour.

According to Eldon Corry, 18,000 hour ATP and General Manager of LetsFly.org, “The new Tiger AG-5B is a perfect fit for LetsFly. With Three Decades of Purebred Flying Passion, the Tiger enhances our LetsFly Cooperatives by offering a four place certified aircraft in addition to our 2-place airplane roster. It is sleek, fast and the most economical aircraft in its class. We’re proud to make it available to our members through our national distribution system and provide an aviation business opportunity that is second to none in the industry.”

By joining LetsFly.org, members can own an airport exclusive cooperative, fly a new aircraft for less than rental costs and enjoy an excellent return on investment. Participation in commissions is also available for qualified LetsFly Cooperatives, which lowers the cost of flying even more.

The LetsFly organization plans to put 15 new Tigers in its cooperative ownership program in 2004, with deliveries increasing to 30 for 2005.
